## **PFI Standards Program Pledge**

My company is committed to participating in the PFI Standards Program. Based on the information we have and PFI's pledge to pursue an aggressive campaign to educate the public and all levels of the industry about the benefit of this program, we expect to begin the fuel certification process as soon as auditors are available in our region.

We support the use of consistent, third party audited standards, and the quality control which these standards represent, as a key component of the growth of the use of pelletized biomass in North America.

I am authorized to express my company's intention to participate in the PFI Standards Program as set forth herein.
